

# LEWES BOAT RAMP

LEWES, DELAWARE  
Project Highlight

<b>Installation</b>	2007
<b>Project for</b>	Delaware Department of Natural Resources and Environmental Control
<b>Features</b>	Two 8' x 50' Courtesy Docks Two 6' x 45' DR1 Gangways Four 8' x 70' Ground Out Docks Aluminum Seawall and Toe Wall to protect the boat ramp foundation from scour

**Project Summary**  
The handicapped accessible public boat ramp features six concrete launch lanes, four full floatation boarding docks and two full floatation courtesy docks, plus a fully accessible, 8-foot wide boardwalk area for strolling and boat watching along the waterfront. The new GatorDock™ installation is located at the mouth of the Broadkill River at Roosevelt Inlet. Boaters now have immediate access to the Delaware Bay, eliminating 15-20 minutes of no-wake-speed travel from the former ramp site. Additionally, the 'green' aspects of all of CMI and GatorDock's products are an additional benefit. State Secretary Collin O'Mara called the project "... a recreational treasure that will allow current and future generations to enjoy the beautiful waters of Lewes. Further, this new facility is a model of sustainable practices that we must work to integrate into future building design,"
