

PINEY NARROWS MARINA

CHESTER, MARYLAND
Project Highlight

Installation	2008
Project for	Private Marina
Features	26 Fingers Fixed Dock 30 foot spans between supports 52 Support Poles Pine Decking

Project Summary

Pole supports for this marina were the concern for this project. Due to the depth the poles needed to be driven, cost to install each pole averaged over \$1000 each. GatorDock's™ lightweight aluminum frame allowed for spans of 30 feet between each set of supports, greatly reducing the cost of building a wooden dock system.
