

TWO RIVERS MARINA

WILLIAMSBURG, VIRGINIA
Project Highlight

Installation 2002

Project for Private Marina

Features 78 slips
12,000 sq. ft
Combination fixed & floating dock system

Project Summary

The developers of this marina had two main goals when choosing their dock and seawall manufacturer: The longest service life and a maintenance free solution. With Crane Materials International's GatorDock™ aluminum docks and sheet pile they answered both concerns with one manufacturer. Their choice 10 years ago means now they can capitalize on aluminum's longevity and maximize their return of investment.
