Project for Garrison Bight Marina

Features 28 slips
5,200 sq. ft
Poly-Tub Floating system with IPE
hardwood decking

Project Summary

Marlin Pier is one of five different piers that make up the famous "Houseboat Row" at Garrison Bight Marina in Key West, FL. Restored in 2008, the 10' wide main dock provides ample room for year-round liveaboards and their extensive shore services. And with the large sail areas and exposed location, the strength of GatorDock's™ aluminum structure brings peace of mind to the full time residents of this marina.
