Project for Private Residence

Features Aluminum Framed Fixed Dock
with TimberGuard® Headers
TimberGuard® Support Poles
Homeowner Installed Decking

Project Summary

GatorDock's™ full frame allowed this homeowner the option of installing his own decking. This long fixed dock is supported by TimberGuard's® fully encased poles and headers to ensure a long life. In areas where marine borers destroy docks and their support system, the homeowner knew what a sound investment the time-tested TimberGuard® products would be.
