**Features** 4' x 28' DR1 gangway  
10' x 46' Custom Designed Poly-Tub  
Floating Dock  
Pressure Treated Pine Decking  
Internal Pile Guides  
Aluminum Cleats

## Project Summary

This homeowner wanted a custom solution that matched the existing waterfront deck. Since the dock rises and falls with the water level, no matter the tide, the client's Carolina Skiff can be driven right up to the dock and hoisted in with the attached winch. Additionally, up to four other boats can be docked on either side of the GatorDock™ gangway and floating dock system.
