Project for Private Residence

Features Single Boat Design
Poly-Tub Floating Dock
Internal Pile Guides
DRII Gangway
Hardwood Decking

Project Summary

The client choose a IPE Decking with a custom hidden fastener system for an ultra clean look. The floating dock, approach pier and gangway were decked in this style as it matched the owner's backyard deck for a seamless transition from back door to boat access. The client also opted for our designers to create a custom shape featuring stepped widths along the dock length to allow space for a second small slip behind the dock.
